AL100 Setup

Work on all 1996 and newer vehicles.

1. CONNECT AL100 TO YOUR VEHICLE

   Connect your AL100 vehicle adapter to the OBD II Data Link Connector under

   the dashboard.

   Turn the ignition ON with engine OFF.

   The LED on the adapter will illuminate red light.

2. TURN ON BLUETOOTH

   Ensure to turn on Bluetooth to enable communication with your AL100 vehicle

   adapter.

   Go to Settings > Bluetooth and set to ON.

   Make sure your mobile or pad is turned on and in range.

3. PAIR UP

   Find your AL100 on the list of discovered Bluetooth devices.

   Tap on AL100-XXXXXXXX to pair up.

   When connection is successful, the LED on the adapter will illuminate blue light.

4. Ready..

   Once connection is made, push the home button and tap on the AL100 icon to

   restart the app.
